

ASHISH PRASAD R

SOFTWARE ENGINEER

Bengaluru, Karnataka · +91 8310109234 · ashish.prasad.co@gmail.com · github.com/Ash0223 · linkedin.com/in/ashi5h/

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience across UI debugging, workflow correction, backend feature development, automated workflow testing and system testing in enterprise healthcare applications. Experienced with Java, Spring Boot and Angular, with recent hands-on work involving Cucumber, Jenkins, Docker and Redis. Strong interest in investigating non-obvious defects, understanding existing system behaviour and learning new technologies to solve practical engineering problems.

TECHNICAL SKILLS

Languages	Java, C#, C++, SQL, Python
Backend	Spring Boot, REST APIs, Microservices, Hibernate, JPA
Frontend	Angular, TypeScript, JavaScript, HTML, CSS
Testing	Cucumber, Gherkin, JUnit, Postman, System Testing, TDD, BDD
DevOps / Infra	Jenkins, Kubernetes, Docker, Redis, Git, GitLab
Engineering	OOP, SOLID Principles, Agile / Scrum, UNIX, Debugging

PROFESSIONAL EXPERIENCE

Software Engineer (Consultant) — Talencia Global | Client: GE Healthcare

October 2024 – Present | Bengaluru, Karnataka

- Resolved UI defects and workflow issues, improving application behaviour and user experience across complex enterprise healthcare workflows.
- During the initial 9 months, focused heavily on UI and UI-workflow debugging, tracing data-flow issues and validating corrections through system testing.
- Debugged workflow problems involving data updates after unit conversions, incorrect data parsing and inconsistent existing logic; applied targeted flags and corrections and verified resulting system behaviour.
- Contributed to the transition from 1080p to 4K by scaling individual UI components and implementing component-specific styling.
- Implemented UI enhancements including tooltip lookups and sorting for tables and columns displaying live patient data.
- After moving to the MR Backend Team, contributed to new feature implementations using Spring Boot and built Cucumber tests for workflow coverage, followed by system testing.
- Implemented and tested a new notification workflow while coordinating with global teams to validate end-to-end behaviour.
- Contributed to SonarQube updates across multiple services, developing a deeper understanding of service structure and dependencies.
- Completed Redis support for cloud-profile testing through Jenkins pipelines, including Redis configuration using Docker; gained hands-on experience with Docker and Redis through the implementation.
- Collaborated with a 40+ member team across the US and China and presented system demonstrations for newly developed features.

PROJECTS

Global Digital Bank (GDB) — Team Project | 2025

Tech: Core Java, MySQL, JDBC · Worked on the Transactions Controller and handler. Built transaction flow handling where one transaction needed to coordinate database updates, user notifications, confirmations and acknowledgements.

Connect My Doc (CMD) — Team Project | 2025

Tech: Angular, Spring Boot, MySQL, Microservices · Built the appointments service and entities for a hospital-management system connecting patients, doctors, hospital staff and pharmacy. Handled requests and updates from multiple microservices using different models for different entities.

Automated Attendance Management using Face Recognition — Team Lead | 2024

Tech: Python, Machine Learning, LBPH, Haar Cascade · Led the team and handled report generation and the face-recognition module after dataset creation, using LBPH and Haar Cascade for recognition and identification.

EDUCATION

ATME College of Engineering — B.E. Computer Science & Engineering | 2020–2024

First Class · Overall CGPA: 7.5

LEADERSHIP & ACHIEVEMENTS

- HPE SwarmIT Hackathon — 4th place as Team Lead.
- Student Council — Placement Secretary, Academic Year 2023–2024.
- Smart India Hackathon — proposed ideas with the team in 2023 and 2024.
- NSS volunteer and participant in social-welfare activities including plantation drives and social-cause marathons.

CERTIFICATIONS & INTERESTS

Udemy: HTML, CSS, JavaScript, Java in Depth · PySpiders: Python, SQL · Interests: Java, Python, AI · Learning focus: AI model creation and data handling
